BLOODSTOCK VALUATION

TO WHOM IT MAY CONCERN

I have been requested to value the Bloodstock quoted herein. I do so taking into consideration the pedigree, breeding and performance of the horses involved.

In my opinion these valuations are as fair and accurate as possible given the information available on the day valued.

I base my valuations on present day market values of private and auction sales. I do however advise that market fluctuations can occur rapidly due to the results of family racing and their own performance changing.

VALUATIONS REQUESTED BY:

Leighton Howl
39 Francis Street
Grey Lynn
Auckland 1021

STOCK VALUED AS AT:

14th January 2025

STOCK VALUE

Interplanetary (3yo gelding Time Test / Sirani)

I have not inspected Interplanetary, I have viewed recent video footage of him parading. I have also spoken to his trainer to get an update on his condition and current status.

I am valuing him at 16 hands, correct and sound, however it needs to be remembered that often the value of a horse is dependent on it passing stringent veterinary examinations including a scope, full x-rays of joints and feet and occasionally tendon scans. For the purposes of this valuation, this information is not available to me so if there were issues, his value would be affected.

To date Interplanetary has raced 10 times for 1 win, 1 second, a fourth and a fifth. While his recent form is only fair, he has shown his trainer potential and he believes he will develop into a nice stayer. The horse has been gelded since his last start which was on 21 March and according to his trainer Shaun Clotworthy, that will be the making of him.

Shaun described him as a nice attractive horse who has a good attitude.

Value: One hundred thousand dollars (\$100,000.00)

Signed this 14th day of April 2025
